

# The 5 Hottest Opt-In List Building Tools on the Planet

(And How to Use Them to Build a  
**HUGE Opt-In List Fast & Cheap**)

**Free Rebrand and Redistribution Rights to This Ebook!**

**NEWLY UPDATED for 2006!**

## **Congratulations & A Quick Note:**

First, by reading this you're taking a huge step toward making your lifestyle dreams a reality. I say that with complete confidence, because what you are about to read is *exactly* what I did to build my MASSIVE list and change my life!

(**Just in case you're not sold on why you need a list:** it's a fact that opt-in lists are the #1 way to build customer trust because you can connect with prospects several times and gradually build your relationship, and customers do not buy unless they trust you. The

pro's estimate you can make \$1/month per subscriber. SO, if you have 10,000 subscribers you can make \$10,000 per month, *EVERY* month!)

**The quick note is to warn you not to be fooled by the simplicity of what you're going to read. I'm sure you've seen some of it before, you probably have even tried parts of this on your own. This is a complete system, and it's the fastest one I've ever seen in building a HUGE list. Both this guide and the steps in it are free, so you have no reason to not give it 100%. If you do find yourself feeling lazy or unwilling to do it, that may be a big clue that Internet marketing isn't your thing.**

**The money is real, the lifestyle is real, but so is the effort. If you aren't willing to do the free stuff, how will you compete against the people who love to work this?**

**Enough of that, now let's get into it...**

## **Section 1: Getting Started...**

In this section we are going to get the traffic "Cyclone" started. You can't get subscribers if no one sees your signup form. The best way to get a fast start that's completely free is with Traffic Exchanges.

We are going to get several "autohit" exchanges to deliver traffic to one "powerhouse" exchange to get you going, fast. **(Don't worry, you're not going to be chained to your computer clicking sites every 30 seconds for credits!)** Here's how it works:

**Start by downloading the Crazy Browser web browser at:**

<http://www.crazybrowser.com/download.htm>

Crazy Browser is very useful because it works like Internet Explorer, Netscape, or Firefox, but it allows you to open several pages at once and more importantly SAVE them together as a group. (This is a huge time saver and you'll see why in a minute).

**Now we need to join Profit Rally, and amazing FREE Promotion Site:**

**[Join ProfitRally](#)**

The best part of this site is that most of the major Traffic Exchanges are all centrally linked through here. You can sign up from this one site, and anyone you refer can signup for any or all of the exchanges and YOU get credit for each one! That's more free traffic to your subscriber signup page. Also, anyone who signs up and chooses a paid membership to any of the programs will generate profit for you also.

After you signup, take 30 minutes and **signup for ALL of the traffic exchanges** (at least the free ones). This is very important because as others signup under you, you don't want to miss out on the free traffic they create for you through surfing. If you only have signed up for a few traffic exchanges, all of the others will be lost credits (and times YOUR site gets viewed). It only takes a few minutes (I know it is tedious!) to get them all setup and then you don't need to worry about it.

Now, here's where it gets exciting...

Assuming you signed for HitPulse (from the ProfitRally site), login and find your **referral link**. **When you use this link to refer HitPulse, you get credits to have your site shown, even if the referrals don't sign up!** This is a huge factor in building your traffic.

Next, login to the other Traffic Exchanges and set your site URL to the **referral link** from HitPulse.

When you surf ANY of the exchanges AND when anyone signs up under you and surfs ANY of the exchanges, you get referral credits from HitPulse. So, you are leveraging all of the exchanges to gain huge traffic from HitPulse. Also, Anyone who signs up under your signups that surfs gives you credits! You can build a solid stream of free traffic to your signup page this way.

Next, set your **signup page** to the site URL in HitPulse. The other great feature of HitPulse is that you can use popups on your webpage—we'll talk more about how to take advantage of this in a minute.

Now open CrazyBrowser and enter the **surf URL** from HitPulse and press [Enter]. HitPulse will load. Next enter the **surf URL** from another of the ProfitRally exchanges. Repeat this to load about 8 Traffic Exchanges at one time under separate tabs in Crazy Browser. Hint: Use the automatic exchanges in this step because you do not need to actively surf—just leave the browser open & you will gain credits!

Once the sites are all loaded, click on "Groups" on the menu bar of CrazyBrowser and choose "Save Group." Name it whatever you want. Now every time you use your computer, start Crazy Browser and click "Groups" then "Load Group." Click on the group name and POP! **All the sites come up and start autosurfing for credits, and it only takes 30 seconds to load them all.**

The manual exchanges will still require you to click, but just keep Crazy Browser running in the background and click back and forth while you are using your computer. After you've got some referrals and built some momentum, you will earn enough free traffic that you don't have to surf at all and still get your site viewed and add subscribers everyday.

### **So, now what? Quick review of what we've done so far...**

- You are earning autosurf credits every second your CrazyBrowser is open.
- Those credits are used by the autosurf exchanges to show your HitPulse referral page.
- HitPulse gives you credits every time that page is shown, even if no one signs up!

So you have 8 sites generating traffic for 1 site just by leaving your computer on & Crazy Browser running. HitPulse will give you "Power Points" which you can convert to credits and get your site displayed. For your site on HitPulse, you now need a signup web page to send your traffic to:

(By the way, even this amount of traffic **WILL** get you some signups as long as you have a good signup page!)

## **Section 2: Get Your Backend Running...**

Now we've got some traffic coming in, and you'll need a web page for visitors to sign up for your list. Of course you'll want a web page to sell your products also, but the first step is to capture as many leads (subscribers) as you can. Then we'll convert them to buyers.

### ***A PROVEN FACT:***

A vital element of online marketing is that people are likely to do business with those they trust. The best online ways of building trust with a prospect is through autoresponder marketing. Give your prospects something valuable, help them understand you can help them, and they will trust you and buy based on your recommendations.

**NOTE:** The point here is that if you try to direct visitors straight to your "sales" page, you will not make any sales, you'll get frustrated, and then you'll doubt this works. You need to 1<sup>st</sup> get prospects, then put them through a sales cycle. (more on that later).

To create your signup page, you should keep the page very simple. It can look professional, but it must be easy to read and easy to sign up. [You also need to give some reason people should sign up](#)—no one wants more garbage email so you need to convince them you can help solve their problems.

Giving something valuable for FREE is good way to get subscribers (software, ebooks, etc). If you can't think of anything, you can use any of these:

- 1) **This ebook (you have full reprint rights and can give it away)**
- 2) **Fly-In Ad Creator software – allows you to make fly-in ads for your web site in less than 5 minutes! Get it here: [Download Fly-In Creator](#)**

**BONUS: Here's a special FREE bonus for you: Viport Creator!** This software allows you to make Viral Reports. Simply, you write (or use someone else's if you have permission) some info article, then use the viport to make an ebook. When your prospects download it, they need to refer 3 people by email before it will open. This can explode your list if you have a high demand ebook! **Download it here, and you can also give it away to your prospects: [Viport Creator](#)**

Use any HTML editor or webpage maker, and **don't spend too much time on your first try** (you are going to need to test & track results anyway, so trying to make the Mona Lisa may be a big waste of time if no one signs up. Take a look at these pages as a guide, and you are welcome to copy them and edit to make your own (right click and select "View Source" then copy and paste to your HTML editor. If you need software to make web pages, I recommend you download the Free Trial of Macromedia's Dreamweaver. I love this tool and use it all the time. [www.macromedia.com](http://www.macromedia.com) ):

[Signup Web Page 1](#)

[Signup Web Page 2](#)

Remember if you use these to change the HTML scripts (at the bottom) for Opt-In-Boom, List Inferno, and Instant Buzz to your own so you get credit. Also, change the HTML autoresponder form so it adds subscribers to *your* mailing list (details follow)!

To complete your signup page, you need a signup box that will collect emails from your prospects. Use an autoresponder service to manage your list and send out emails automatically. **The autoresponder will become your #1 sales tool, so make sure you use a good one.**

If you don't have one yet, my personal recommendation is Get Response Autoresponders. They have a long standing reputation for reliability, include some powerful features (like automatic tracking of each link in your messages—you can see exactly how many readers click each link, which is huge for testing). They also have the highest delivery rate of any autoresponder (fewer messages get blocked by email filters. And the more that get delivered = the more money you make!)

You can get a FREE trial here: [GetResponse Autoresponder FREE Trial](#)

Once you signup for an autoresponder (or login to the one you have), you need to select the option to “Get HTML Code” so you can link it with your web page. Copy and paste it into your page and now you have your signup page linked to your autoresponder. FTP your webpage to your web host (I am assuming you know how to do this, but if you don't have a web site registered yet visit [www.onewebhosting.com](http://www.onewebhosting.com) or search “web hosts” and pick one. Sign up for the lowest level account for now, and they will give you tutorials on how to upload your webpages so they can be seen on the Internet). **Make sure you list the page's URL in Hitpulse to send the traffic there. (like this: <http://www.yoursite.com/webpage.html>)**

Next, you need to create a series of emails to load the autoresponder so new signups will get a series of emails over time. This repeated contact helps build confidence and trust. **Again, your first few emails need to give value and not be sales-oriented (if you try to sell hard too soon, people will unsubscribe).**

Here are the emails to use if you're giving away this ebook. Even if you aren't, use these as a guideline to see how to set it up:

**SUBJECT:** Lesson 1: Build Your Massive Opt-in List

Dear [\[\[firstname\]\]](#),

You are receiving this email because you requested information about Exploding Your Opt-in List! with email address [\[\[email\]\]](#)

## "How to Build a Massive Opt-In List Fast & Cheap"

### Lesson 1: Basic Setup

Hi [[firstname]],

This is the first in a series of installments - which will explain exactly how to build a MASSIVE opt-in subscriber list fast & cheap.

Okay, so everyone knows that you need a big list to make any money, but it seems to take too long or cost too much to create it, right? Well, what I am about to show you will completely change your mind about that.

Click here for your lesson:

<http://www.i-vault.biz/m1429h.html>

It's time to get excited because you've started on the path to Internet wealth. When you look up a month from now, you'll be happy you took this big step.

To your success,

Brett Ingram, I-Vault.biz  
(Life transforming knowledge in action)  
<mailto:admin@i-vault.biz>

### **Download all 5 emails here: [Autoresponder Emails](#)**

Just cut & paste into your autoresponder, and edit what you want.

You need to load each one into your autoresponder and set them to be delivered in consecutive days. By sending one email per day for a few days, your emails become recognized and more will be opened (obviously important when you're sending offer emails in the future).

**IMPORTANT: [Use the SAME headline everyday, only changing the lesson number.](#)** Your subscribers will recognize the email and open it. Otherwise it may be deleted and not read.

Follow these simple steps to set your Autoresponder (if you have GetResponse):

- Login to your account

- Click on "Messages" tab
- Click on "Edit Messages" link
- Click on "Create a new message >>>" link
- Copy and Paste First day message with Subject
- Set the "Interval" 0 and press "Save"
- Click on "Create a new message >>>" link again
- Copy and Paste Second day message with Subject
- Set the "Interval" 1 and press "Save"
- Add rest 3 messages with interval 2, 3 and 4
- Click on "Messages" tab again.
- Click on "Test Messages" link
- Enter your email address and send Test message to ensure that every thing is ok.

Great! Now you have:

- 1) light traffic coming in automatically, giving you more traffic from HitPulse
- 2) HitPulse traffic is seeing your signup page, and any signups are automatically added to your mailing list in your autoresponder.
- 3) Your autoresponder is sending out one email per day for 5 days with new lessons or gifts to build customer relationships.

**NOTE: Signup yourself to make sure everything is working!**

## Section 3: Let's Get Viral...

You've got the basics setup, but to really build traffic we need to get your list and traffic building virally. In case that's new to you, here's a quick illustration:

- |                          |            |   |   |                   |
|--------------------------|------------|---|---|-------------------|
| 1) You sign up           | =          |   | = | 1 subscriber      |
| 2) You get 5 subscribers | =(1 + 5)   | = |   | 6 subscribers     |
| 3) They each get 5       | =(5 x 5)   | = |   | 31 subscribers    |
| 4) They each get 5       | =(25 x 5)  | = |   | 156 subscribers   |
| 5) They each get 5       | =(125 x 5) | = |   | 781 subscribers   |
| 6) They each get 5       | =(625 x 5) | = |   | 3,906 subscribers |

Can you see how fast it can grow? This is the real secret to making huge lists in a flash! Let's take the next step, and sign up for these FREE viral tools...

**1) Sign up Free for Link Brander.** Link Brander is a free tool that disguises your links to make sure you get credit for affiliate referrals, but more importantly each link contains a small banner ad. Every time your page is visited you earn credits that will get your ad shown! And, every person who signs up under you also earns free credits for you when their pages are shown.

So, signup for free and then *create a link URL that will direct users to your signup page*. Simply login and enter your signup page URL and click "Create Link." It will create a simple address like [www.linkbrander.com/go/xxxx](http://www.linkbrander.com/go/xxxx) for you. When it is clicked, it will direct people to your signup page, but will also generate ad credits for you!

Login again to HitPulse, and **change your site's URL to the new Link Brander URL** that was created. Now you'll be earning free traffic from other exchanges, getting your signup page viewed (and adding subscribers), AND earning credits from Link Brander to get your site seen even more.

**YES, I've tested this with HitPulse and it works. That means every time your HitPulse page is viewed with your free credits, you get ad credits from Link Brander that will in turn give you more site views, automatically! [Click Here to Link Brander](#)**

Again it's a simple concept, but becomes VERY powerful as you rack up subscribers. **It also really does work, and you WILL get subscribers with it.**

**2) Sign up Free for Opt-In Boom.** Opt-In Boom is an exit fly-in with ezine subscriptions, and [I get new signups every day with it](#). You put some HTML code on your web pages and every time a visitor leaves your page a fly-in ad displays a number of mailing lists they can sign up for. You earn credits every time the ad is shown, regardless if anyone signs up. Credits get your ad shown on other people's exit fly-ins.

**YES, I've tested this with HitPulse and you can use this on your signup page. That means every time your HitPulse page is viewed with your free credits, you get Link Brander credits & 4 views of your Opt-In-Boom ad, automatically! [Click Here to Get Opt-In Boom](#)**

Again it's a simple concept, but becomes VERY powerful as you rack up subscribers. **It also really does work, and you WILL get subscribers with it.**

**3) Sign up Free for List Inferno.** List Inferno is a box that appears on your web page offering several checkboxes for ezine signups. It's another amazing tool for generating subscribers for you. Again it's FREE, and [I get new signups every day with it](#). You paste 1 line of code on your site to get your ad seen by others. The trick is, place the HTML code on the line just above </body> so it appears on the bottom of your web page (it won't distract would-be subscribers) [Click Here to Get List Inferno](#)

YES, I've tested this also with HitPulse, and you can use this AND Opt-In-Boom together on your signup page. That means every time your HitPulse page is viewed with your free credits, you get Link Brander credits, 4 views of your Opt-In-Boom ad, AND 1 view of your List Inferno ad, automatically!

**4) Sign up Free for InstantBuzz.** InstantBuzz is a breakthrough, patent-pending advertising technology that will send targeted visitors to your site immediately. It's free and takes only a few seconds. It's a "Traffic Toolbar" that installs on your browser in about 10 seconds and start sending you targeted traffic. You will be amazed how you survived without it. I can't give you direct link to sign up because it's **"invite only"**. If you want one of my invitations, send me an email with subject line **"Invitation to InstantBuzz"** or [Click Here](#) and I'll send you an invitation ASAP. You'll love this. **All I ask is that if you ask for invitation, make sure you use it. I don't have enough to waste any.**

YES, I've also tested this with HitPulse, and you can use this AND Opt-In-Boom AND List Inferno together on your signup page. That means every time your HitPulse page is viewed with your free credits, you get Link Brander credits, 4 views of your Opt-In-Boom ad, 1 view of your Instant Buzz ad, AND 1 view of your List Inferno ad, automatically!

**Can you see the power of this?**

With HitPulse, Link Brander, Opt-In-Boom, List Inferno, and InstantBuzz, you also will get people signing up under you, which gives you MORE free views of ALL of your ads! Then, as your signups add signups of their own, you get **Exponential Viral Growth!**

**A proven fact:**

**People who make the most money are the ones who advertise and promote the most.**

To review:

- 1) Sign up for Link Brander, Opt-In-Boom, List Inferno, and email me for Instant Buzz.
- 2) Add the HTML code they provide to your signup page, test view it, and FTP to your web site to replace your old signup page.
- 3) Watch the "hit counters" and subscriber list begin to pile up!

## **Section 4: Testing, Testing, 1...2...3...**

Now that we have our "opt-in system" setup, we only have 1 objective: **to get the subscribers piling up as fast as possible!**

**To build your list as fast as possible, you absolutely HAVE to TEST your campaigns to monitor your results and make changes to get maximum results. If you guess what's working the best instead of knowing by testing, you will waste time and money.**

So how do we test what's working? The easiest way to test is to use split testing & stats tracking software. The idea is the software gives you a special web address to promote. When people click that address, it forwards them to your actual sites but also tracks their click as a "hit."

You can add tracking to actions and sales also, so you'll know exactly how many people follow each link on your pages, and how many buy from you. By doing that you will know 2 critical things:

- 1) Which promotion tools are giving you the best results.**
- 2) Which headlines and ads are getting the most readers to click through and sign up.**

Once you know that, you simply edit each campaign and ad. For example, if you find that one of the tools we setup is giving you 5x the number of subscribers as the rest and they offer an upgrade option, THAT's where you want to spend your hard-earned budget.

**WARNING: Don't make the big mistake many marketers make by leaving the campaigns that are working alone and wasting time and money to get others up to speed! Maximize the ones that ARE working 1<sup>st</sup> and see if you can get even more out of them, THEN work on the weaker ones.**

(The tools I recommended to you give me a GREAT response so I stick with them. I tweaked my ads and worked them hard before giving up on any, but I tried dozens of tools and the "duds" I scrapped before writing this so you wouldn't have to deal with time wasters.)

Another thing you need to do is keep a spreadsheet or notepad to track your results. As your campaigns and tools expand, it will be impossible to keep all the info in your head. Take a notepad (or I use a spreadsheet) and write down the following to keep track:

- \* **Tool used (OptinBoom, List Inferno, etc.)**
- \* **Headline & ad content you're using**
- \* **Results (# hits, # views, #signups)**

Give each campaign a chance to work, but if you get lots of views without anyone clicking your ad, the ad is not exciting to them and needs to be changed. 300 Hits is more than enough to test, but don't change your ads before getting at least 100 because you can't tell enough from that.

**So how do you test them?**

## The best tool I've found for testing is [Pro Analyzer](#)

Pro Analyzer does not require a monthly fee, it has VERY clear install instructions (and they'll do it for you if you need help), and it's VERY easy to use and understand. Check it out here: [Click Here to Get ProAnalyzer](#)

Now, here are some rules of thumb I use for what's "good" in terms of response rate. You need some baseline to measure against to know whether ads are working or not. Note that these are NOT to discourage you if you start off getting less, but to let you know to keep testing until you at least hit these numbers. It took me a few tests and different ads before I got any signups, but once I found good ads it just took off:

### Traffic Exchanges (HitPulse)

I have found the best way to use Traffic Exchanges is to use 3 sites for split testing. Not only will this help you determine what works and what doesn't, but also because you will have the same people viewing your ads multiple times (not every view of your ad is unique—some people surf for hours and might see your ad 3-4 times) you stand a better chance to get them to signup by trying 3 different approaches vs the same ad 3 times.

As a rule of thumb, I get 1 signup per every 100 views or so.

### [Opt In Boom](#)

My #1 Site, Hands Down! You should get 1 signup for every 200 views (if you're using the automatic hit engines with your page the way I recommended you'll get well over 1,000 per day just starting out, and once it builds you can get 20,000+ per day!). If you upgrade to Autochecked RED listings, you should get 1 per 100).

### [List Inferno](#)

Another great site. You should get 1 signup for every 200 views. Like Opt In Boom, these tools give you exponential growth in views when others sign up below you, so you can literally get your ad seen 20,000 per day and RACK UP the subscribers)

## **Pay per click Ads**

These are so popular I thought I'd put them in here. If you use them, one personal recommendation is DO NOT USE Brainfox! I ran several promotions with their site, and the hits kept piling up but no results. I did some research and actually found a web site that has seen similar things: <http://www.1010mlm.com/brainfoxreview.html> I am in no way affiliated with them nor does it affect me in any way personally, but I wanted to share my experiences to save you the trouble.

That said, there are several other PPC engines available. I use Yahoo and Google now, and typically you want to bid low because you're getting signups and not making profit yet. You can expect to get 1 subscriber per anywhere from 10-50 hits. I know it's a broad range, but I am trying to give you a sense.

## **Solo mailings to SafeLists**

These have very low response rates, but because you can send 100,000s at a time, you can do very well with these if used correctly. The key to safelists is to sign up for enough to be emailing 500,000+ at least every week. And it's your headline that is most important with these—safelist members get tons of emails, so a boring headline will be deleted before it's read. Great headlines = great results.

I email over 1,000,000 per week, and I am able to do it in less than 5 minutes. Also, I can track all of the results, try different headlines, and clean my inbox effortlessly in a couple clicks. My secret for Safelists is here: [Secret to Safelists](#)

## **Search Engine Optimization (SEO)**

This is such a hot topic it makes sense to cover it in this section. It's common knowledge that with a high search engine ranking you will get 1,000s of hits for free from people searching keywords in the search engines. There are a few methods of increasing your ranking, but unfortunately there is no "silver bullet" that can guarantee you get (and keep) a high ranking.

The summary version is that "spiders" from the search engines crawl the Internet and look for sites that have lots of content. Sites with content that is frequently updated and added are considered more "worthy" of a higher ranking. The challenge is that it takes time to constantly add new content to your site, particularly because sales links and offers are not considered quality content.

The other aspect of search engine rankings is the number of back links to your site from other sites. The idea is that if your site is well connected and many others want to link to it, it is valuable to web searchers. Again, there are software utilities that try and “trick” the spiders and some will even get you a good rank temporarily. But more often than not the trick is discovered and your site rank will plummet. I have found one exception to this, and I was so impressed that I use it. My sites have jumped 100,000s in rank. You can check this out for yourself: [Links Master](#)

Now if these numbers discourage you, take heart! If you use the tools that allow for others to sign up under you and give you free traffic (HitPulse, Link Brander, Opt In Boom, List Inferno), you will be amazed how fast your total hits and signups will add up.

The other idea I mentioned is split testing. In addition to the regular tracking of stats, ProAnalyzer and some other tools allow you to provide 1 link people click that automatically alternates visitors between 2 or 3 web sites. That means you can run 3 web pages with the same content, and just make 1 change (headline, bonus, etc). Based on the clickthroughs you'll know which is best. Then use that one against another test, etc...

**If you keep track of your results and make changes when you should, testing is THE difference between success and failure. You've seen those great ads--do you think the author wrote that perfectly the 1st time? VERY unlikely. They tested and tested until they found a winner. Then promote that winner EVERYWHERE!**

**TIP:** If you are unsure what parts of your ads or web pages to change for testing, surf the web for a while searching for your competitor's web sites. See what they use and try something similar.

## Section 5: Where to Go From Here...

These steps will get you well on your way, but they may take some time to really ramp up and gain momentum. If you want some ideas to supercharge your growth, these are the things that worked very well for me:

- 1) Get the Opt-in List Building Deluxe Package. See the details here: [Opt-in List Building Deluxe Package](#)
- 2) Get the “Red & Checked” upgrade on Opt-In-Boom. It’s a one time charge to keep those settings for life, and if you see what their fly-in looks like the Red, pre-checked ads get many more hits. (I started to get double the number of signups)
- 3) Join the My Mad Mailer Safelist. Email over 1,500,000 people weekly, track links, clean your inbox, test headlines. See it here: [My Mad Mailer](#)
- 4) Get credits from HitPulse. Very cheap, and each view gets you all those FREE ad views from your other tools. I get signups from HitPulse, AND I get new signups from all the others.
- 5) Sign up for as many promotion tools as you can and try them. Just remember that the cheaper it is, usually the worse the response. Test them several times each, and keep what works and scrap what doesn’t. If it’s FREE though, even if you get 1 new subscriber each time it’s worth it.

As your list grows, it will gain momentum and growth will pick up speed every day. Be patient and stick with it. Also, you need to continue to build relationships with your mailing list subscribers beyond the few simple emails we sent.

**A good rule of thumb is to email your list every 4-7 days**—more than that and you’ll get unsubscribe requests because people don’t want to be bombarded. Less than that and they’ll forget who you are.

Don’t always send offers to buy something. Those are fine too (you’re in this to make money), but find other quality giveaways and free info to help them. It will go a long way and you’ll be rewarded in the end.

**Not sure what you want to Promote to your Subscriber List?**  
I've compiled a researched list for you...

These are some of the best-selling Internet Marketing Affiliate Programs -- and now you have the opportunity to recommend these quality products to your subscribers.

You can join these Affiliate Programs—**at absolutely no cost, with absolutely no risk**—and start profiting from products that are earning current affiliates thousands of dollars every month.

Nitro ListBuilder: [Click Here](#)

Affiliate Power Ads: [Click Here](#)

Adword Equalizer: [Click Here](#)

WebLock Pro: [Click Here](#)

### **Final Note:**

You are now entitled to the MASTER Rebrand and Redistribution Rights to this Hot-off-the-presses Ebook "The 5 Hottest Opt-In List Building Tools."

You can freely reprint, rebrand and redistribute this ebook!

*You should give away this ebook to as many people as you can. You can get 5, 10 or even 100 times more visitors by branding it with your affiliate ID's and giveaway for FREE. The more you give the more traffic you get. Earn Multiple Streams Of Residual Income...*

- Distribute this to your friends, co-workers, business associates.
- Share this with your visitors, customers and subscribers to build trust.
- Use this as an incentive or bonus for signing up to your newsletter.
- Boost the perceived value of your product and service by offering this as a bonus.

To your success,

*Brett Ingram*
